NEW HARDY HYBRID RUGOSA ROSE
SIR THOMAS LIPTON

THE CONARD & JONES COMPANY,
West Grove, Pa., U. S. A.
Growers of The Best Roses in America.
NEW ROSE SIR THOMAS LIPTON.

NOTE...This Magnificent New Rose was named by special permission in honor of SIR THOMAS LIPTON, of LONDON, who has made several plucky attempts with yachts Shamrock to recapture the silver cup won many years ago by American sailors, from the English.

We have had this splendid rose on trial for several years and now take pleasure in recommending it as the finest Pure White Hybrid Rugosa Rose yet produced. It is a strong vigorous grower, making a handsome bush, 4 to 5 feet high, well covered with bright glossy green leaves, which shine as if varnished. The flowers are 3 to 4 inches across, perfectly double and pure snow white. They are very fragrant and borne on strong upright stems all through the growing season. It is one of the Hardest Roses in Existence, and therefore particularly valuable for planting in cold climates and exposed localities where other roses do not thrive. It does well everywhere and can be depended on to make a strong handsome bush and produce plenty of large double pure white roses for several months every season. It is especially recommended for yard, park and cemetery planting. Sir Thomas Lipton belongs to in the same class with "New Century" and is a worthy addition to this splendid new Class of Roses. It might very properly be called the "White Century." 3 year field plants, $1.00 each. 2 year field plants, 50 cents each; $5.00 per dozen. 4 inch, 50 cents each; $5.00 per dozen. 2½ inch, 30 cents each; $3.00 per dozen; $20.00 per 100.

New Hardy Rose "NORTHERN LIGHT"  

An elegant new pillar or vase rose may be trained as a climber or set in the border, as desired. It is a strong upright grower, and can be trained to make great masses of beautiful pink and white roses of such hardiness that the name "Northern Light" or "Aurora Borealis" was naturally suggested. Flowers are of medium size, larger and more double than Crimson Rambler. The color of the flowers varies from deep pink to bluish white, showing many different shades and combinations of pink and white at the same time. It has clean elegant foliage, and is a most interesting new hardy Climbing Rose. 3 year field plants, $1.00 each. 4 inch plants, 40 cents each; $4.50 per dozen. 2½ inch, $2.00 per dozen; $15.00 per 100.

...NEW CENTURY...

ROSE
NEW
CENTURY

NEW CENTURY is a cross between the lovely Clotilde Sou-
per and Rosa Rugosa- Alba. It is perfectly hardy and
blooms at short intervals all through the
Summer and Fall. The flowers are 3 to 4
inches across, perfect, 3- or 4-petaled,
double and borne in splendid clus-
ters. The color is bright rosy pink, with
bright red centre, and falling all the petals
widely bordered with
five creamy white as
shown in illustration.
It is very sweet and
has the delightful fra-
grance of the Wild
Rose. It has been
called the New Iron
clad Ever-Blooming
Rose which de-
scribes it exactly, for
besides being entire
hardy it seems im-
vulnerable to attacks of in-
sects, rust or blight
and is a real Iron-
Clad, Continuous-
Blooming Rose, en-
tirely different from
all ever-blooming
varieties: should be
planted in rich ground
and kept well manur-
ed to induce vigorous
growth and continu-
ous bloom. It is a
strong upright grower
of compact habit, and
is well furnished with
bright glossy green
foliage. The foliage
alone is sufficiently
ornamental to win a
place for it in any
yard or garden. New
Century is very desir-
able for cemetery
planting and makes a
grand and showy
hedgerow.

NEW ROSE RUBY QUEEN

Ruby Queen is a very hardy climbing Rose. It is a strong, vigorous, upright grower, and is particularly well furnished with a glossy, bright green leathery foliage. The foliage has a peculiar but pleasing fragrance, and like the Sweet Briar Rose, this fragrant foliage calls attention to the presence of the bush when no bloom is in sight. The fragrance, while pleasing to mankind, seems to be very repulsive to insect pests, and makes the bush almost proof against their ravages. The color is different from any other rose, and is hard to describe. We call it Ruby Red, but this term only conveys a faint idea of the beautiful color, or how nature has shaded this color from lighter petals in the centre to darker petals outside. The flowers are double, medium to large in size, and are borne in clusters. It is a free and early bloomer, and is recommended for all situations where hardy, free blooming climbing roses are wanted, and particularly for places where slug-eaten foliage is not desirable.

PEARL QUEEN

The bush is like May and Ruby Queen. It is evergreen and retains its foliage well into Winter, which adds to its beauty. Its round, thick leaves are so bright and glossy, they shine as if varnished. The flowers are medium large and fragrant, perfectly double to the centre, and remaining bright and fresh a long time after opening. **NOTICE**

We make a specialty of growing new Cannas. Several thousand new seedlings are started each year, and we think that we are quite safe in saying that the great variety of colors presented in these trial fields cannot be duplicated anywhere else, the world over. These are not all chance seedlings by any means; many of them come from seed that has been carefully hybridized, and the improvement that comes from careful work of this kind is very noticeable. We have had several generations at times growing in the same patch, and it is truly interesting to notice the great advance in color, form and durable qualities that has been produced by the work of the careful hybridizer. These Canna patches are always interesting to look over during the latter part of the Summer, and we extend a cordial invitation to all our friends to come and see them.
Orchid Flowering Cannas

Pennsylvania

This is a grand canna and a true hybrid, Duke of Marlborough being the seed parent. The flowers are as large as the largest of the Orchid flowering class, and the color is a deep rich scarlet. It is a very free bloomer, six to eight large spikes in bloom at a time not being an uncommon sight from a single plant, with several large flowers open on each truss. On our grounds it blooms twice as freely as any of the Orchid flowering varieties that we have tried. Like this class of Cannas it is a tall grower. The foliage is abundant, the leaves large, well rounded, tough, and of a rich green color. The free blooming habit, bright red color, and the size of the flowers easily make "Pennsylvania" a leader of its class. (See cut on page 17).

NEW PIERN FERN...

Probably the greatest novelty introduced in many years. This new fern is a sport from the Boston Fern and has the same strong, vigorous habit of growth; but it is indescribably more beautiful. The fronds of the fronds subdivide, thus giving them a plume-like appearance, absolutely different from any other fern, and they hang in such arching gracefulness that the Pierson Fern out-classes all other ferns. The numerous gold medals that it has won attest to the accuracy of these statements. It is a splendid house plant, small plants being beautiful as well as the large specimens. 1 1-2 inch, $1.10 per dozen; $8.00 per 100. $70.00 per 100.

A Convincing Bit of History.

Our Beautiful Canna Lilies are the most satisfactory plants one can use for producing a gorgeous display of brilliantly colored flowers all Summer long. They are now extensively planted in the finest public parks and home lawns. When first grown in our grandmothers' gardens the Canna was known as the "Indian Shot Plant," but then its flowers were too small to attract attention. Later, Europe sent us kinds with larger flowers—but they were not well suited to our climate. About a dozen years ago, the Vice-President of our Company, and our veteran rose grower, Mr. Wintzer (see photo, above), became convinced that by careful hybridization, the Canna could be made to produce larger flowers and more brilliant colors that would stand our hot suns and whipping winds. We regret that lack of space forbids details, for the process of originating a new flower is a fascinating story in itself. How much we have done in producing for America a NEW RACE OF CANNAS, Superior in every way to the old, may be read on the Canna pages of this or any other up-to-date catalogue. We have produced more than 50 excellent kinds, including the richest reds, the purest yellows and prettiest pinks, and in fact the best in all shades. Each year we devote a large area to testing new varieties. We grow the best, discard the rest. WE ARE CANNA SPECIALISTS. See Prices and Description on page 12. Also see Color Plats.
